

NUFLO™

Single & Dual Chamber Meter Runs

The meter runs are fabricated by trained manufacturing personnel with complete facilities for machining, welding, gauging and inspection. This produces a product with quality and metering accuracy not possible with field-fabricated units.

All meter runs are factory-aligned and welded with special equipment that guarantees a straight, smooth meter run without defects. Standard lengths meet AGA/API requirements.

Optional Methods of Meter Run Alignment

Orifice fitting to meter run alignment can be specified with dowel pins or male/female flanges. These options assure proper bore alignment. Meter runs may be also be manufactured to meet customer specifications.
