

JISKOOT™ Propane/Butane Blender

Project Name: Lagos Terminal Upgrade

Location: Lagos, Nigeria

End User: NAVGAS

Year: 2014/15

Scope of Application: LPG Blending system, designed to blend Propane and Butane in differing ratios to produce a stable, consistent LPG for bottling, tanker loading or transmission

Challenges: To provide an accurate blend using an RVP analyser to feedback and trim the blend to optimum parameters

Customer Benefits: Accurate blending of LPG reduces “Giveaway” of expensive Butane without compromising the quality of the finished product, thereby reducing costs and increasing operator margins.
